JOURNAL OF
Inorganic Biochemistry

seeking to establish direct communication between inorganic and biological chemists

Papers are invited on the following subjects: the chemistry, structure, and function of metalloenzymes and of coordination compounds of biological interest; the interaction of inorganic compounds with proteins and nucleic acids, the enzymatic and nonenzymatic biochemistry of small molecules, elementary biocatalytic processes, the fundamental aspects of enzyme action, enzyme models, the prebiotic synthesis of biologically important organic compounds, the function and distribution of trace elements in living systems, and related subjects.
